and print...

...any newspaper
of choice

The Satellite Newspaper CLiENT is a software application that enables you to print the latest edition of international newspapers on your own printer, either one copy at a time or in bulk.

Any Newspaper of Choice

Satellite Newspapers, a global distributor of digital newspaper editions from publishers around the world, introduces a revolutionary solution for same-day newspaper printing and distribution: The Satellite Newspaper CLiENT.

The Newspaper CLiENT provides instant access to printable PDF editions of over 135 international newspaper titles on the day of publication. These newspapers are of the same familiar layout as the editions readers would purchase and read at home.

Satellite Newspapers tracks and verifies the exact number of copies printed by each subscriber. Printed copies are accounted for by means of credit card payment or a monthly invoice.

Satellite Newspaper CLiENT

A sophisticated software application

Instant access to over 135 newspaper titles from 55 countries

User friendly and easy to install

Compatible with any printer (preferably A3 duplex) and MS Windows (98 SE or better)

Newspaper offering is updated on a 24/7/365 realtime basis

Start today!

You can download the Newspaper CLiENT software application directly from our website. Other than a nominal installation fee, you only pay for the newspapers you have printed. Once you have installed the Newspaper CLiENT software you're only three steps away from your newspaper of choice:

Select the newspaper title(s) you would like to download

Select the newspaper title(s) you would like to print

Begin printing...then retrieve your newspaper(s)...hot off the press!

Fast access, Fast printing

By distributing the news digitally and electronically rather than shipping in printed form, Satellite Newspapers offers you access to newspapers only minutes after the printing process in the country of origin has started. For instance, European and Asian newspapers can be printed 5 to 8 hours before they even hit the streets in Europe and Asia.

operating system

The Satellite Newspaper CLIENT is a software application that enables you to print the latest edition of international newspapers on your own printer, either one copy at a time or in bulk.

Globetrotting newspaper junkies who previously were limited to the International Herald Tribune, USA Today and the Wall Street Journal Europe now have more options: just look for a Satellite Newspaper KIOSK.

Washingtonpost.com

Getting a copy of your hometown newspaper, wherever you are in the world, is now almost as easy as buying a drink from a vending machine.

The Asian Wall Street Journal

So instead of trying to revolutionize reading habits, Satellite Newspapers, a Dutch startup, is using kiosk technology to bring readers whichever newspaper they want...
